Avanti Windows understand the importance of maintaining their presence in the marketplace, particularly during tough economic times. Constant repetition of a simple message drives it into the public consciousness and can make your company the first one people associate with your product or services.

FENSA Registered Company

Avanti Windows are locally based in Grantham, Lincolnshire making them exactly the sort of company Gravity FM was established to support. As a community radio station we primarily exist to provide a service to all parts of the local community, entertaining audiences and keeping the local community in touch with each other. In the case of our local business community we aim to help promote local businesses and to provide affordable advertising and marketing opportunities. In exchange the revenue raised helps to keep us on the air and develop our facilities as many of our corporate clients discover when

they visit the station to see for themselves. Avanti Windows have been part of this partnership for many years.

In addition to regular on-air advertising, Avanti Windows Ltd are also the sponsors of our window and bumper stickers. As such their logo is seen all over the local area when listeners are driving their cars out and about. Another partnership bringing marketing success to both organisations brought to you by Gravity FM.
